

With the principal of Kenmore High School

Award winners at the University of Queensland

Presenting at the University of Queensland

MovieWorld

Conference room at the University of Queensland

With the principal of Bulimba State School

Hello! We're Marine 5! We were filled with jubilation when we won the 1st National Weather Study Project 2006! Embarking on this project proves to be both intellectually exciting and highly rigorous.

As part of our award, we went to Brisbane, Australia one week from 10th-16th of July 2006. It was indeed a fun and enriching experience to be there. So now we are going to share with you our FUN in Australia!

Ready? Marine 5...4...3...2...1!

What an educational and entertaining trip it turned out to be! We attended and presented at the Students of Sustainability conference at the University of Queensland and visited Kenmore State High School and Bulimba (Primary) State School. It was eye-opening for us to learn about the environmental projects undertaken by the Australian schools. What struck us was their strong belief and conviction in their cause to create a sustainable school environment. Singapore schools have a lot to learn from them!

Not only did we just present our projects, we actually had a chance to visit famous tourist attractions in Brisbane such as the Australian Zoo, Movie World, Dream World, Underwater World, Super Bee, Sunshine Coast and Gold Coast. The fun would not have been completed without fellow winners from Chong Fu Primary School, Fu Hua Secondary School and Hwa Chong Institution.

All in all, the trip to Brisbane had been a trip-of-a-life-time. The programme had a good mix of play and work. Every good thing, however, must come to an end. We

felt very fortunate to have such memorable moments before we took our 'O' levels and part for different JCs.

You see, hardwork paid-off with a great price (prize)? To do or not to do, there is no try. Don't hesitate! Grab hold of your teacher, form a team and be our successors. Best of luck to the next batch!
